APPLICATION DEVELOPMENT AND EMERGING TECHNOLOGIES
FINAL PROJECT MVP FEATURES

TEAM LEADER:	VILLANUEVA, GEN LHETTER
PROJECT TITLE:	BarangayDocs: A Cloud-Based Barangay Document Request and QR-Verified Processing System for Residents and Officials of Barangay Banicain, Olongapo City

User Roles

1. Resident / Requester
2. Barangay Clerk / Staff Processor
3. Barangay Official / Approver
4. System Administrator (IT Personnel)

Resident / Requester – MVP Features

1.1 User Registration and Profile

- Create account with valid resident details (name, address, contact info).
- Ensures verified barangay residents only.

1.2 Document Request Submission

- Request barangay documents (e.g., Certificate of Residency, Clearance, Indigency).
- Select purpose and upload supporting requirements if needed.

1.3 Request Tracking System

- Track request status (Submitted, Processing, Approved, Ready for Release, Released).
- Improves transparency and reduces follow-ups.

1.4 QR Code Claiming System

- Receive QR code for approved documents.
- Used for secure verification during release.

1.5 Notifications and Updates

- Receive updates on request status and availability.
- Keeps residents informed in real time.

Barangay Clerk / Staff Processor – MVP Features

2.1 Document Request Management Dashboard

- View and manage all incoming document requests.
- Organize requests by type and priority.

2.2 Processing and Encoding Tools

- Encode and prepare requested documents digitally.
- Standardizes document generation.

2.3 QR Code Generation and Verification

- Generate QR codes for approved documents.
- Scan and verify QR upon release to prevent fraud.

2.4 Release Scheduling System

- Schedule document pickup times.
- Reduces congestion at barangay office.

Barangay Official / Approver – MVP Features

3.1 Approval Workflow System
- Review and approve or reject document requests.
- Ensures proper validation of requests.

3.2 Digital Signature Authorization
- Approve documents digitally before release.
- Speeds up processing time.

3.3 Monitoring Dashboard
- View processing status of all requests.
- Helps manage workload and efficiency.

3.4 Reporting and Compliance Tracking
- Generate reports of issued documents and request volume.
- Supports administrative auditing.

System Administrator (IT Personnel) – MVP Features

4.1 Role-Based Access Control (RBAC)
- Manage access for residents, staff, and officials.
- Ensures secure system operation.

4.2 Audit Trail Logging
- Track all document requests, approvals, and releases.
- Ensures accountability and transparency.

4.3 System Configuration
- Manage document types, QR rules, and workflow settings.
- Ensures flexibility and scalability.

4.4 Data Backup and Recovery
- Secure storage of all documents and transaction records.
- Prevents data loss.
